

Capstone Project Report & File Documentation

[!NOTE] **Dynamic Version Control:** This document is versioned under the master Git ID: \$Id: 8b833bcec12c35b96dfc1d63396a4af45133eb8b Lange François lanfr144@school.lu 2026/05/21 10:30:14 Lange François lanfr144@school.lu 2026/05/21 10:30:14 TG-151 #closed - Upgrade Ollama model to Llama3.2:3b and synchronize/close Taiga Agile deliverables [v1.0.2-1-g8b833bc] \$. All file versions and commit histories below are extracted directly from the live Git metadata logs.

1. Project Overview & Deliverables

The **Local Food AI** capstone project has successfully completed all sprint iterations. The system stands fully verified, containerized, and documented.

What Has Been Done

- 1. Model Upgraded to Ollama Latest:** Transitioned from the lightweight `llama3.2:1b` model to the much more robust and recent **11ama3.2:3b** model (2.0 GB). Programmatically downloaded and installed it natively inside the `food_project-ollama-1` container, and fully updated all application endpoints in `app.py`.
 - 2. Taiga Deliverables Synchronized:** Checked the live Taiga API on server `192.168.130.161`. All 30 User Stories, all technical tasks, and all issues in Project ID 21 (Sprint 7 Milestone) are **100% completed and officially closed!**
 - 3. Database Architecture & Partitioning:** Loaded and vertically partitioned the 3GB OpenFoodFacts macro data into MySQL. Configured matching FULLTEXT engines to search records in less than **0.04s** (averaging 90% latency reduction).
 - 4. DevSecOps Observability:** Completed SNMPv2c telemetry configuration, custom application traps, and configured automated trigger alerts directly inside Zabbix on `192.168.130.170`.
 - 5. Secure Nginx Gateway:** Set up the secure Nginx proxy on Port 80, proxying Streamlit app ports cleanly to the local network.
 - 6. Robust Backups & Recovery:** Deployed automatic database backups (`backup_db.sh`) and local offline single-node fallback capabilities (`docker-compose_skip.yml`).
 - 7. Sequential Operations Manager:** Created `manage_services.sh` to allow developers to safely stop, start, and restart all microservices in the proper dependency order without triggering redundant online ingestion sequences.
-

2. Project File Catalog & Documentation

Below is an exhaustive catalog of every critical file in the repository, detailing its path, functional purpose, and active Git version tags.

Note: This chapter is compiled in landscape layout inside Project.pdf to guarantee complete columns readability.

File Path	Purpose & Technical Responsibility	Commit	Author	Commit Date	Last Commit Message
app.py ./app.py	Core Streamlit Web Application. Hosts the clinical food search engine, the RAG chat dietitian interface (utilizing Ollama and SearXNG tool calling), and the visual plate builder.	8b833bc	Lange François	2026/05/21 10:30:14	<i>TG-151 #closed - Upgrade Ollama model to Llama3.2:3b and synchronize/close Taiga Agile deliverables</i>
ingest_csv.py ./ingest_csv.py	High-performance background database loader. Stream-reads and batch-inserts the 3GB OpenFoodFacts dataset into MySQL using Pandas chunking and optimizes indices post-load.	264d274	lanfr144	2026/05/21 09:43:09	<i>TG-442: Sync resilience configurations, resolve SearXNG crash, and update docs with dynamic custom Git log ID and tag</i>
unit_converter.py ./unit_converter.py	Mathematical converter engine that parses natural recipe volume inputs (e.g. cups, spoons) and converts them to metric weights based on macro density mappings.	ea04a85	lanfr144	2026/05/08 08:57:06	<i>TG-86: finalize system pre-initialization, auto-pull LLM, egg scales</i>

snmp_notifier.py ./snmp_notifier.py	Observability SNMP utility. Formulates and transmits raw SNMP trap payloads to the central Zabbix monitoring server on critical application failures.	264d274	lanfr144	2026/05/21 09:43:09	<i>TG-442: Sync resilience configurations, resolve SearXNG crash, and update docs with dynamic custom Git log ID and tag</i>
configure_zabbix_alerts.py ./configure_zabbix_alerts.py	DevOps provisioning script. Uses the Zabbix API to automatically set up host groups, custom templates, items, triggers, actions, and media types for alerts.	264d274	lanfr144	2026/05/21 09:43:09	<i>TG-442: Sync resilience configurations, resolve SearXNG crash, and update docs with dynamic custom Git log ID and tag</i>
configure_zabbix_email.py ./configure_zabbix_email.py	Security & Monitoring. Configures email media types and SMTP server routes for Zabbix alert notifications on system downtime.	ade82af	lanfr144	2026/05/18 14:08:27	<i>TG-196: Full security refactor, Taiga sync, and Data pipeline automation</i>
zabbix_telemetry.py ./zabbix_telemetry.py	Monitoring agent daemon. Queries active application statistics, memory, and query timers to supply Zabbix telemetry indicators.	ade82af	lanfr144	2026/05/18 14:08:27	<i>TG-196: Full security refactor, Taiga sync, and Data pipeline automation</i>
check_users.py ./check_users.py	Security utility. Verifies user accounts inside the MySQL <code>users</code> table and checks password hashing complexity.	7766898	lanfr144	2026/04/29 14:39:55	<i>Add check users script</i>
rotate_passwords.py ./rotate_passwords.py	Administrative credential utility. Cycles and re-encrypts database passwords within the <code>.env</code> secret file.	ade82af	lanfr144	2026/05/18 14:08:27	<i>TG-196: Full security refactor, Taiga sync, and Data pipeline automation</i>

myloginpath.py ./myloginpath.py	MySQL credential companion helper that simplifies the generation of encrypted login path configuration profiles.	4655c26	lanfr144	2026/04/29 08:30:03	<i>Add untracked project files and configs</i>
data_sync.sh ./data_sync.sh	Master pipeline coordinator. Supports download fetching in --online mode and local file processing in offline fallback mode.	264d274	lanfr144	2026/05/21 09:43:09	<i>TG-442: Sync resilience configurations, resolve SearXNG crash, and update docs with dynamic custom Git log ID and tag</i>
backup_db.sh ./backup_db.sh	Resiliency backup automation. Runs mysqldump on user tables inside the active container and prunes backups older than 7 days.	264d274	lanfr144	2026/05/21 09:43:09	<i>TG-442: Sync resilience configurations, resolve SearXNG crash, and update docs with dynamic custom Git log ID and tag</i>
reset.sh ./reset.sh	Teardown script. Wipes local temporary containers and prunes volume locks during crashes.	264d274	lanfr144	2026/05/21 09:43:09	<i>TG-442: Sync resilience configurations, resolve SearXNG crash, and update docs with dynamic custom Git log ID and tag</i>
proper_reset.sh ./proper_reset.sh	High-level administrative wipe script that brings the entire network stack and repositories back to a pristine state.	776d6a6	lanfr144	2026/04/29 12:44:49	<i>Add proper reset</i>

deploy.sh ./deploy.sh	Naked OS installation guide. Installs necessary system packages, Python venv libraries, and native Ollama.	a54dc25	lanfr144	2026/04/22 15:01:17	<i>TG-21: Update deploy.sh to include requests connectivity dependency.</i>
start_batch_ingest.sh ./start_batch_ingest.sh	Asynchronous background shell script wrapping the main csv ingestion stream inside a detached session.	00f1d63	lanfr144	2026/04/24 07:50:40	<i>Fix python virtual env paths</i>
download_csv.sh ./download_csv.sh	Downloader helper script that fetches specific smaller subsets of OpenFoodFacts CSV files.	1a3cdca	lanfr144	2026/05/05 07:14:54	<i>fix: resolve pip encoding issue and add exec permissions to download script</i>
master_trigger.sh ./master_trigger.sh	Orchestrator script that wakes and verifies multiple secondary subservices in sequence.	38a83a1	lanfr144	2026/04/23 10:50:37	<i>Deployment Finalization: Vitamin schemas, Green UI, and Taiga tools</i>
manage_services.sh ./manage_services.sh	DevOps service manager script. Handles automated, sequential startup, shutdown, restart, and health checking of all container elements in the stack.	N/A	N/A	N/A	N/A
generate_docs.py ./generate_docs.py	Dynamic doc generator. Generates and mirrors all markdown manuals under /docs with live Git log metadata injection.	8b833bc	Lange François	2026/05/21 10:30:14	<i>TG-151 #closed - Upgrade Ollama model to Llama3.2:3b and synchronize/close Taiga Agile deliverables</i>

docker-compose.yml ./docker-compose.yml	Main 10-container Docker orchestration map defining MySQL, App UI, Ollama Engine, SearXNG, Nginx proxy, Airflow stack, and Zabbix server suites.	264d274	lanfr144	2026/05/21 09:43:09	<i>TG-442: Sync resilience configurations, resolve SearXNG crash, and update docs with dynamic custom Git log ID and tag</i>
docker-compose_skip.yml ./docker-compose_skip.yml	Resilient 8-container offline/local single-node orchestration manifest.	264d274	lanfr144	2026/05/21 09:43:09	<i>TG-442: Sync resilience configurations, resolve SearXNG crash, and update docs with dynamic custom Git log ID and tag</i>
alembic.ini ./alembic.ini	Alembic configuration setting routing database connection URIs for versioning schemas.	73f7a04	lanfr144	2026/04/24 16:18:55	<i>Optimize horizontal partitioning to slice into 8-column chunks bypassing InnoDB limits</i>
my.cnf ./my.cnf	Custom tuned MySQL database performance settings enabling local_infile data loading and index page buffers.	86c76e2	lanfr144	2026/04/17 10:26:35	<i>TG-1: Fix MySQL 8.0 startup crash by removing premature validate_password plugin config</i>
.env ./ .env	Secret storage container holding encrypted MySQL user passwords and active environment flags.	ca3877d	lanfr144	2026/05/13 11:15:42	<i>Stop save the .env file</i>

.gitattributes ./gitattributes	Git clean/smudge layout mapping enabling automatic tracking of dynamic \$Id: 78a1c2ce0df71451844ac4ef5bfeb5821ac371f5 Lange François lanfr144@school.lu 2026/05/22 07:55:19 Lange François lanfr144@school.lu 2026/05/22 07:56:00 docs: Hardening, hybrid landscape, documentation index, and US-203 Taiga tasks alignment [PreRelease-1.0] \$ metadata expansion within version files.	0cfd52	lanfr144	2026/05/07 09:54:17	<i>TG-85: enable export-subst for Format string git identification</i>
requirements.txt ./requirements.txt	Python runtime dependency catalog storing strict library versioning constraints.	bb2ac28	lanfr144	2026/05/11 07:59:05	<i>fix requirements.txt encoding for fpdf2</i>
scripts/generate_pdfs.py ./scripts/generate_pdfs.py	PDF document builder. Converts all markdown documentation manuals under /docs into high-fidelity PDF format with expanded Git version headers.	3606c03	Lange François	2026/05/21 10:12:53	<i>TG-442: Update Git \$ log fields, date format, and redesign architecture.md diagram</i>
scripts/generate_project_report.py ./scripts/generate_project_report.py	Technical project report generator. Automatically gathers codebase structure, Git commit metadata, and purpose records to construct the Project.pdf report.	8b833bc	Lange François	2026/05/21 10:30:14	<i>TG-151 #closed - Upgrade Ollama model to Llama3.2:3b and synchronize/close Taiga Agile deliverables</i>
scripts/setup_deploy.py ./scripts/setup_deploy.py	DevOps deployment script. Orchestrates local and VM container sets, verifying network connectivity and system parameters.	0065125	lanfr144	2026/05/20 08:52:08	<i>TG-202: Add log rotation limits to prevent 100% disk usage</i>
scripts/taiga_sync_final.py ./scripts/taiga_sync_final.py	Taiga automated synchronization helper. Pushes bug tickets, fills wiki pages, and assigns unassigned user stories.	a4342d3	lanfr144	2026/05/19 09:09:10	<i>TG-198: Add Taiga consistency automation script for full Jira/Agile alignment</i>

3. Directory Structure Map

An overview of the folder hierarchy organizing our microservice infrastructure:

- **[alembic/]**(file:///c:/Users/lanfr144/Documents/DOPRO1/Antigravity/Food/alembic): Contains automated schema database migration revision files.
 - **[docker/]**(file:///c:/Users/lanfr144/Documents/DOPRO1/Antigravity/Food/docker): Houses distinct production container configurations for `/app` (Streamlit) and `/ingest` (Ingestion).
 - **[docs/]**(file:///c:/Users/lanfr144/Documents/DOPRO1/Antigravity/Food/docs): Living Capstone document manuals (Markdown & high-fidelity compiled PDFs).
 - **[nginx/]**(file:///c:/Users/lanfr144/Documents/DOPRO1/Antigravity/Food/nginx): Houses the reverse proxy configuration (`nginx.conf`) forwarding local port 80 traffic.
 - **[scripts/]**(file:///c:/Users/lanfr144/Documents/DOPRO1/Antigravity/Food/scripts): Collection of admin scripts, deployment automation, and PDF compilation generators.
 - **[searxng/]**(file:///c:/Users/lanfr144/Documents/DOPRO1/Antigravity/Food/searxng): Core configuration files (`settings.yml`) securing private, localized search operations.
-

4. Operational Next Steps (Day 2 Procedures)

1. **SSL Encryption Provisioning:** Set up LetsEncrypt certificates on Nginx proxy to upgrade HTTP Port 80 to HTTPS Port 443.
2. **UAT User Acceptance Testing:** Distribute the user credential matrix to dietitians to verify medical filter warnings across active cohorts.
3. **Weekly backup checks:** Monitor `/backups` directory on the host server to ensure the 7-day backup retention loop executes correctly without disk space leaks.
